

Technical Assistance (NIP) to the Ukraine Urban Road Safety Project

Introduction

Kiev, 14 November 2019

Investment that matters

Innovation

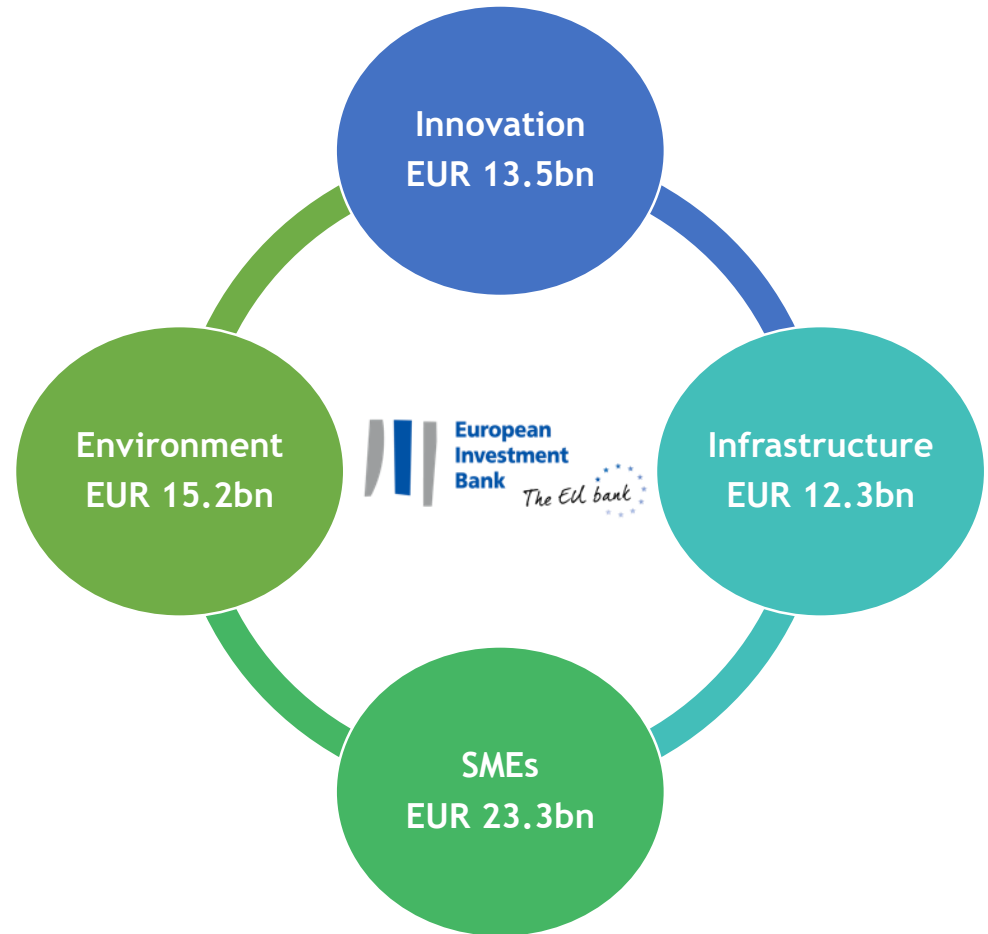

Environment

Infrastructure

SMEs

Total EIB financing signed in 2018:

EUR 64.2bn

What we do it

- Transferring financial advantage to bankable projects complying with EU and national policies
- Requirements:
 - economic
 - financial
 - technical
 - environmental
 - social
- In-house technical expertise to check eligibility and support project development + **access to grants.**

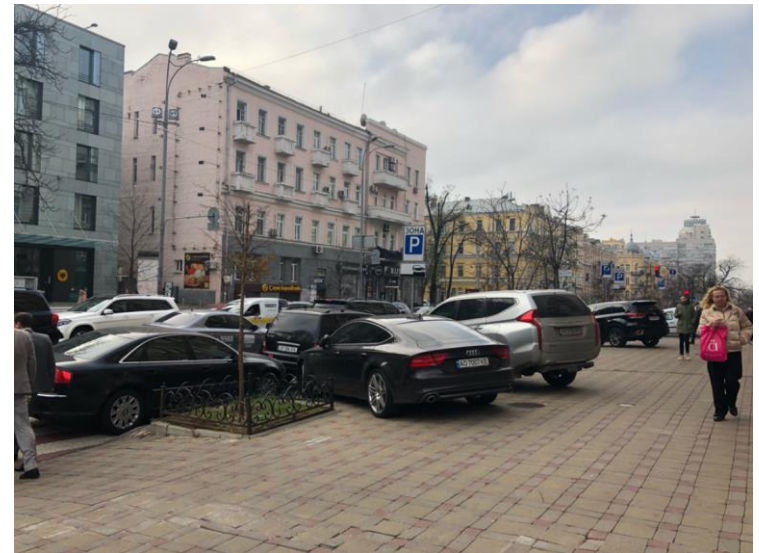

Liveable cities

The city - a shared space

- Vehicles dominate our streets
- Transport planning has traditionally allocated space to cars
- Means of transport are vital – but come with side effects

What can we do?

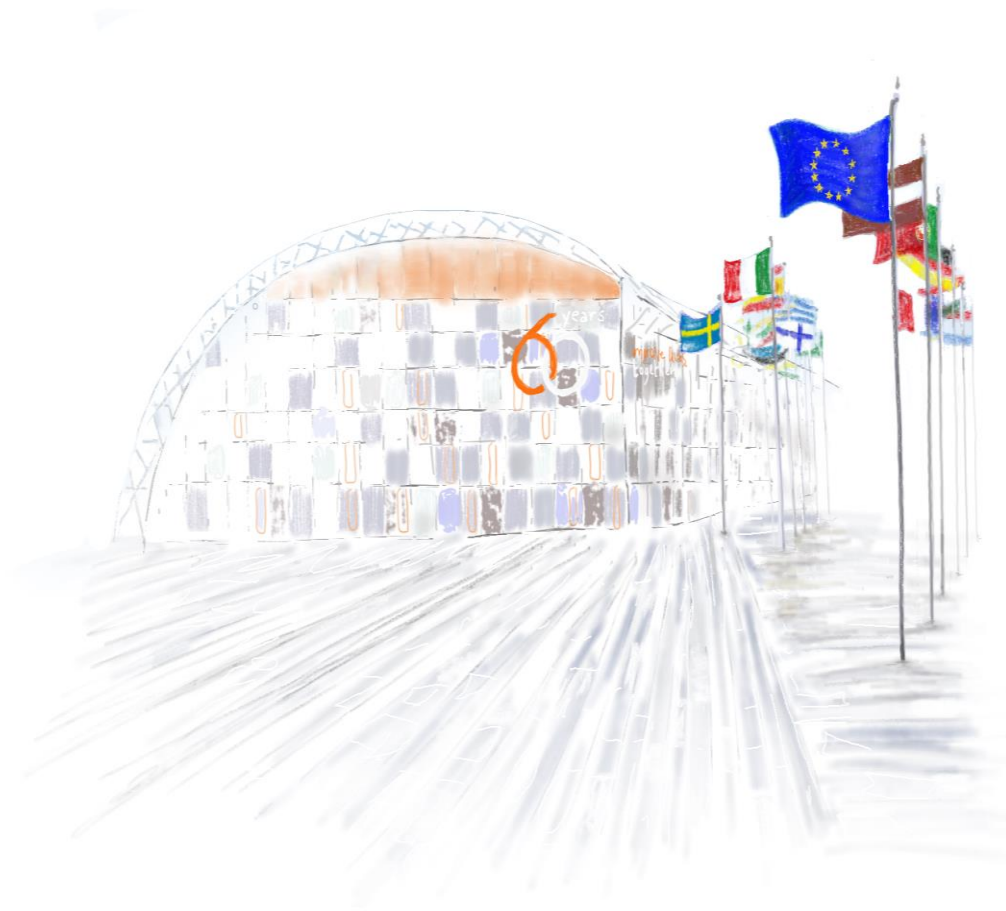

- Planning and management of parking
- Move people to public transport
- Better and safer conditions for pedestrians and cyclists

The emergency of ITS, in all its forms

- Will gain momentum – but not solve our problems in the short run
- Existing systems to control traffic, speeds and collect data
- Road accident data

Thank you!
