**Information correction of Ukrainian ports` names in accordance with United Nations Code for Trade and Transport Locations (UN/LOCODE)**

Submitted by Ukraine

<b>Executive summary :</b>	This document presents proposal concerning names updating of Ukrainian ports in accordance with the UN/LOCODE system.
<b>Action to be taken :</b>	Correction measures in the official the UN/LOCODE system concerning the names of Ukrainian ports.

1 The UN/LOCODE system is developed and supported by the United Nations Economic Commission for Europe in Geneva and by other international organizations.

2 It is important to mention that currently there are some Ukrainian ports which are indicated incorrectly in the official Black Sea Memorandum system, namely: "Illichivsk" (to be changed into "Chornomorsk"), "Oktyabrsk" (to be changed into "Olviia"), "Nikolayev" (to be changed into "Mykolaiv") and the port of Dnipro-Buzkyy is to be deleted out of system cause of its non-existence.

3 Taking into account mentioned above, there is a need to take correcting measures on renewing of indicated data and also to change incorrect name of digital function classifier by excluding of code "1" (specifies that the location is a Port) from the section "Function" on information of following settlements: Bar, Brody, Dnepro-Buzhskiy, Orzhiv, Rivne, Shostka, Susly, Ulegorsk, Ust Donetsk

**Information about sea ports of Ukraine**
